Ben is a Mental Health Peer Support Student completing his study placement with PsychLab in 2021. Ben is passionate about veteran health. He noticed that young veterans sometimes have difficulty knowing how to find local health services, especially to find practitioners who have some knowledge of the Department of Veteran Affairs (DVA). As part of his placement, Ben researched and compiled a list of local services that may be of assistance. This is not an exhaustive list. We hope it is a starting point.
